Women's Annual Wellness Exam and Testing

You are scheduled today for your annual Well Woman Exam. This annual exam is also referred to as a Preventative Medical Service. This Preventative Medical Service consists of a routine examination only.

If you are now experiencing a problem or issue, or have a pre-existing problem or issue you want the provider to address during your exam, a problem visit code will be reported to your insurance carrier as additional time will be needed to diagnose your problem. This problem code would be reported in addition to the appropriate preventative care code.

If an additional code is used, you may be responsible for an additional co-payment or deductible. Our office and/or billing department does not know how your insurance deals with additional coding until we have submitted the claim and received an explanation of benefits from your insurance carrier. You may receive a statement for any additional fee your insurance deems is your responsibility.

In addition, we may be ordering/recommending further screening/diagnostic testing. This does not guarantee that it will be covered by your insurance plan. We can provide you with the appropriate billing codes for you to verify coverage with your insurance company. The billing for performing these tests is completed by an appropriate facility and not our office. If you do not verify coverage for these tests, you may become responsible for the bills. It is your decision whether to have these screening/diagnostic tests.

We apologize for any inconvenience this may cause. However, we have no option but to conform to the reality of medical care in today's environment.

By signing this notification, I verify I have read and understand the changes of medical care as explained above.
